DETAILED ACTION

After further search and consideration this action was issued and made final.

Allowable Subject Matter

1. Claims 9-20 allowed.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 5-8 rejected under 35 U.S.C. 103(a) as being unpatentable over Irikawa et al. (WO97/08757) in view of Sawada et al. (5,475,256)

Regarding Claims 5-8, Irikawa et al. disclose a waveguide type photodetector where in Fig. 2 it is disclosed a substrate 22, a detecting layer 14 formed on the substrate wherein an optical signal from a light source I focused on the detecting layer 14 and an attenuation layer 18 disposed between the detecting layer 14 and the light source I such that the incident optical signal passes through the attenuation layer. Iriwaka et al. fail to disclose the attenuation layer to be a PIN structure. However, Sawada et al. disclose an opto-electronic integrated circuit where in Fig. 4, attenuation layer 100 is specified as to be a PIN structure.

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the required PIN structure for the attenuation layer in

Art Unit: 2826

Irikawa et al. as taught by Sawada et al. in order to have a photodetector device with increased flexibility.

Regarding Claim 6, PIN structure of Sawada et al. has a thickness.

Regarding Claims 7 and 8, PIN structure of Sawada et al. is either biased forward or reverse.
